
He's a killer.

where's baby?
Look before you lock.

safercar.gov/heatstroke

A hot car can be deadly! Always be sure to look twice. It's easier than you think to forget your baby in the backseat.

where's baby?
Look before you lock.

In 2013 alone, at least 44 children in the United States lost their lives after being left in unattended motor vehicles, and an unknown number of others were moderately to severely injured.

- Heatstroke in vehicles is the leading cause of all non-crash related fatalities involving children 14 and younger.

Warning signs vary, but symptoms of heatstroke may include:

- red, hot, and moist or dry skin
- dizziness
- no sweating
- nausea
- a strong rapid pulse or a slow weak pulse
- confusion
- a throbbing headache
- being grouchy or acting strangely
