Wood County

Survey Response Rate

Comparison Area	Response Rates		
	Part C	At Risk	Combined Total
Wood County	46%	48%	47%
Small Counties (10,000-50,000)	51%	51%	51%
Statewide	41%	40%	41%

Response Rate Calculation Method

In calculating response rates for counties, ODH took a number of steps to achieve the most efficient measure possible, taking into account lags in data entry for exited children and family circumstances. The initial data pull for all Part C families receiving services on December 1, 2006 included those who were exited in Early Track (hereafter, called **Part C Extract**). In order to achieve an appropriate pool of survey recipients, ODH staff removed the following groups from the potential pool:

1. families whose exit from the program was reflected in the Early Track system (hereafter, **Early Track Exits**).
2. families judged inappropriate to include because:
 - (1) they were duplicated on the list because two or more siblings were in the program, or
 - (2) the family was in crisis at the time of survey distribution (hereafter, **Crisis/Duplicates**). These families were eliminated from the distribution pool altogether.
3. families noted by counties who should have been exited in Early Track but, for whatever reason, were not (hereafter, **County Reported Exits**).
