

#9: Early Head Start (EHS)

Can a family be enrolled in Early Head Start and HMG Home Visiting at the same time?

Release Date: April 24, 2014

Response:

A family **may not** be dually enrolled in EHS Home Base option and HMG Home Visiting as the services are duplicative.

Questions to Consider for Planning and Programming:

Can a family be dually enrolled in an EHS Full-day/Full-year option and HMG Home Visiting?

Yes. The Full-day/Full-year EHS option does not provide as intensive of a parenting education component that HMG Home Visiting does and therefore would not be considered a duplication of services.

Can a family be dually enrolled in EHS (all options) and HMG Early Intervention?

Yes. A family may be dually enrolled in EHS and HMG Early Intervention because EHS is mandated to serve at least 10% of infants and toddlers who have IFSP's.

Authorizing Rule:

3701-8-04 (B)

(4) Communicate with other local or community programs serving children to **minimize the duplication of services and supports** to potentially eligible pregnant women, infants, toddlers and their families.
