

# Ohio MCH Fact Sheet

## Women's Health, Birth Outcomes, Newborn Health Access

### **MCH Block Grant Health Systems Capacity Indicators (HSCIs)**

- In 2007, about 51 percent of all Ohio infants were eligible for Title XIX (Medicaid services). By race, 68 percent were white and 30 percent were black; 4.5 percent were of Hispanic ethnicity.
- In 2007, 80.5 percent of Medicaid enrollees younger than 1 year of age received at least one periodic screen.
- In 2007, 64.6 percent of SCHIP enrollees younger than 1 year of age received at least one periodic screen.
- Note the large decrease in numbers reported in 2004 for both HSCIs. In prior years, the data were limited to children younger than 1 year at any time in the reporting year and included children who may have turned 1 in the reporting year. These data reflect children whose age was younger than 1 year for the entire reporting year.

HSCI #2: The percentage of Medicaid enrollees whose age was younger than 1 year during the reporting year who received at least one initial periodic screen.

	Annual Indicator Data									
	1998	1999	2000	2001	2002	2003	2004	2005	2006	2007
Annual Indicator (%)	90.7	78.4	76.9	79.0	81.5	82.3	88.2	80.4	81.5	80.5
